FAQs

What are the upcoming start dates for Thinkful courses?
Please reach out to our admissions teamto find the latest start dates on the corresponding course page of interest.

What options are there for people who work full-time?
We offer Flex programs (part-time) for all of our courses. Please visitThinkful.comto find the latest start dates on the corresponding course page of interest.

What is the experience level for Program instructors?
Instructors are chosen based on their academic credentials, relevant industry experience, and teaching ability. Thinkful collects weekly feedback from students and staff on program curriculum, projects, and overall student experience in order to evaluate the quality of

each program. In addition to student experience, Thinkful also considers industry demand for particular skill sets and success rates with each program in order to look for areas of improvement, ensuring that each program has successful outcomes that matches Thinkfuls mission on a quarterly basis.The minimum requirements to serve as a mentor, technical expert, or faculty for all Thinkful programs include:3+ years of relevant industry experienceDemonstration of genuine student advocacy and empathy for beginnersExceptional written and verbal communication skillsWhat support do you offer students during the program?You are fully supported from the moment you join Thinkful with a comprehensive, personalized approach to your success that means that while youre learning online, youre never alone. Regardless of the program you choose, youll have access to:1:1 Mentorship -- youll be assigned a mentor whose focus is on getting you hired and helping you build a profile that best shows off your skills and strengthsTechnical coaches/Live Chat -- in addition to technical coaching and office hours sessions, our newly launched virtual messaging platform means you can get answers to study-related questions in real time.Access to a Slack community -- youll have plenty of chances to pair with and learn from your fellow students in a safe, fun, online environment.What is the experience level for Thinkful mentors? Can I choose my own?As of now, mentors are assigned by Thinkful based on fit and availability and cannot be chosen by students. The minimum requirements to serve as a mentor is 3+ years of relevant industry experience, demonstration of genuine student advocacy and empathy for beginners and exceptional written and verbal communication skills.What are the Career Services offered after completion of a program?Thinkful is dedicated to educating and connecting students to career opportunities via curated workshops and post-graduation support. The Careers team at Thinkful empowers students through a host of programming and resources that are aimed at career advancement as well as transparent outcomes. We provide career support in the form ofIndividual and group sessionsMock behavioral and technical interviewsCurated technological contentThematic workshops and career-focused Q&As, topics for which include but are not limited to networking, technical landscape, resume and LinkedIn reviews, cover letter writing, negotiating, navigating the job search, and interview preparationDo I need a computer to take the course?Thinkful programs require a computer with a

microphone, speakers, webcam, and high-speed internet access. We do not provide you with a computer, and every student must own or have access to a personal computer with at least 16GB RAM, at least 2.0 GHz processor (GPUs are not a requirement), and at least 256 GB HD. Additionally, the computer must be able to download applications and software; computers like Chromebooks will not work.For full-time programs,you're required to additionally provide the following equipment at your own cost:A reliable Mac or PC with video capability including a webcam and microphone. Headphones are highly recommended. Macs must have the most current OS version installed, and PCs must be using Windows 10 or newer operating systems.Reliable internet connection fast enough to stream video sessions clearly for upwards of 8 hours a day.Additionally, all Data Analytics courses require Excel in order to start the course.
